Proto Labs, Inc.
5540 Pioneer Creek Dr.
Maple Plain, MN 55359

To whom it may concern,

I'm writing to express my interest in the Information Security Intern listed on Proto Labs website. I believe my experience and education have considerable overlap with the needs of this position, which should make me an exceptionally competitive candidate.

For the past 10 years, I have worked as a data analyst for a variety of different companies, mostly within eCommerce. While working in data analyst roles I discovered that I needed to change my career path and finally pursue my passion for IT.

I am currently attending college in the evenings for Networking and Cyber Security. I would appreciate any opportunity or mentorship to get my foot in the door for an information technology career. I also have skills that can cross over from my past roles like working on complex projects, experience with SQL server and writing SQL queries, SAS, working with many types of databases, advanced skills in Microsoft Excel and Adobe, project management skills, as well as working in agile environments.

I am eager to enter the constantly changing world of information technology, I feel that my combination of past experiences along with my passion and drive for IT would provide you with an excellent candidate for this position.

Please consider the attached resume for a more detailed picture of my past experience.

Sincerely,

Nick Barrett
